### Education

#### FULL STACK OPEN BOOTCAMP – UNIVERSITY OF HELSINKI

Full-stack web development

Helsinki, Finland (Remote)

April 2023 – March 2024

#### HOLBERTON SCHOOL

Associate's degree, Software Engineering

Lima, Peru (Remote)

June 2021 – March 2022

### Projects

#### CAR MERGED MARKETPLACE

Sep 2024 – Nov 2024

Source: <https://github.com/eams1798/best-car-deals>

- Web app that shows cars from different websites to get the best deal.
- React was used for the frontend and ExpressJS for the backend.
- Used a web scraper to search in Facebook and Craigslist marketplaces.
- Integration with Google Maps API to get the correct city name where the scraper will look for cars.
- Used Anthropic AI API to get specific information about the selected car model.

#### BLOGAPP - Project for University of Helsinki

Jul 2023 – Mar 2024

Source: <https://github.com/eams1798/part12-containers-applications/tree/main/blogapp-docker>

- Web app for create, read, update and delete blogs.
- Allows user registration and login.
- Used React Redux in the frontend and MongoDB and ExpressJS in the backend.
- Complemented with a CI/CD pipeline and Docker containerization.

### Skills
